Project Developers in CsDA,
Projects in Hqrs

Subject: Provision of E-LOCKER facility in DAD.

E-LOCKER has been developed by IT & S Wing, Hqrs to cater for the storage and back up needs of all the Official documents across DAD. Users may back up all their official work done on local machines to a secured and safe place over E-Locker. In case the documents/data kept on local machine/PCs is lost for some unavoidable reason then this back up data on E-Locker can be used to restore it on local machine.

This application facilitates the user to log in to the system and save their official documents/data on central server. The user can also retrieve any such data saved by him any time he wants. This data is available to him all the time across the DAD offices connected on DADWAN.

E-Locker has following added features-

1) User have access to his data/documents only. One user can't view others documents.

2) Running on Central server

a) the storage capacity can be increased based on users requirements.

b) Data/files are secured.

c) Available to the user 24X7 across DAD over WAN.

d) Data/files have continuous back up and replication facilities.
